(54) LIGHTING FIXTURE FOR VEHICLE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a lighting fixture for a vehicle for preventing the poor appearance of a lighting fixture due to construction with a bulb socket mounted on a reflector and improving the reflecting efficiency of the reflector.

SOLUTION: A bulb socket 4 has a fitting groove 410 formed in L-shape in a side view on the outer periphery of a cylindrical socket body 401 and a fitting member 22 on a socket mounting cylinder portion 21 of a reflector 2, on which the bulb socket 4 is mounted, protruded in the direction of the inner diameter to be engaged with the fitting groove 410 of the bulb socket. The fitting member 22 is fitted into the fitting groove 410 in the state of mounting the bulb socket 4 on the reflector 2, therefore preventing the exposure of the fitting member 22, inhibiting the generation of a dark black around the bulb socket 4 and improve the appearance of a lighting fixture.
